MISSION STATEMENT

I'm currently looking for a job either at-home or in an office or even a job in the labor field. I would like to work and live in place that is more city like but not crowded. I'm hoping that whatever job I can get a good number of hours as well as a good amount of pay and friendly environment and multiple resources to learn.

EDUCATION

Molinaroli College of Engineering and Computing, University of South Carolina

Columbia, SC

Bachelor of Computer Information Systems

May 2028

Major: Computer Information Systems

GPA: 3.4/4.0

Relevant Coursework: Website Design, Data Science, Algorithmic Design, Computing in the Modern World, What is the Metaverse

WORK EXPERIENCE

G&R Asbestos and Demolition

Charleston, SC

Systems Manager

January 2023 – current

- Generated detailed permits, proposals, and invoices for asbestos and demolition projects, ensuring full regulatory compliance and accurate documentation.
- Coordinated field-to-office operations across demolition sites, streamlining communication and workflows to support safe and efficient project execution.
- Oversaw the transport and disposal of asbestos waste, managing logistics and compliance for jobs involving 500+ sq ft of hazardous material per site.

Vincent Chicco's and Victors Steakhouse

Charleston, SC

Assistant Server

January 2025 – August 2025

- Assisted in serving and supporting over 100+ customers, ensuring prompt food delivery, table resets, and a positive dining experience in high-volume environments.
- Delivered meals and cleared tables efficiently while maintaining cleanliness standards and supporting servers during peak hours.
- Resolved customer concerns with professionalism and composure, including diffusing tense situations and escalating issues as needed to maintain guest satisfaction.

PROJECTS

Personal Resume Website

Charleston, SC

Full Stack Developer

January 2025 – May 2025

- Designed and built a dynamic industry-experience web page for Demolition using HTML, CSS, and JavaScript to showcase work in asbestos and demolition fields.
- Implemented responsive layout, navigation, and content sections (e.g. "Industry Experience → Demolition") to provide a clear, user-friendly presentation of professional experience.
- Programmed interactive and maintainable site structure, enabling easy updates and integration of new content (e.g. for other project categories) with consistent styling and format.
